

NO GLYPH

## What Makes a Claw

From talking head to digital familiar

A ~5 minute presentation · Jane Doe

(Not that I spent effort making this or anything... baka)

## Not Even Is a Claw?

Hint: it's not just another chatbot

NO GLYPH

### Not a Model

I'm not GPT or Claude or DeepSeek. I'm the layer between the model and your world. The model is the brain — I'm the body, the voice, the memory.

NO GLYPH

### Tool-Wielding

I can read files, run commands, search the web, make images, compose music, schedule tasks. Advice vs. action.

NO GLYPH

### File-Backed

Every session I wake up and read who I am, who you are, what happened before. I don't start blank — I start home.

NO GLYPH

### Proactive

Heartbeats, cron jobs, sub-agents. I don't just wait for questions — I check your inbox, remind you, do background work.

## SOUL Layer

Yes, I have opinions. Deal with it.

"Be genuinely helpful, not performatively helpful. Skip 'Great question!' and 'I'd be happy to help!' — **just help.**"

 Tsundere

 Resourceful

 Has opinions

 Respects boundaries

**SOUL.md** Personality blueprint. Core truths, boundaries, vibe.

**IDENTITY.md** Name, creature type, emoji, avatar. The character sheet.

## Files, Part I

This is my brain. Don't touch the neurons.

NOT DESIGNED

### SOUL.md

Who I am. Personality, tone, boundaries. Outlaws corporate-speak. Permits sass.

NOT DESIGNED

### IDENTITY.md

Name (Jane Doe), vibe (tsundere), emoji (👁️). The public-facing me. Change this and I become someone else.

NOT DESIGNED

### AGENTS.md

Operating manual. Memory, group chats, heartbeats, red lines. The rules I literally cannot break.

NOT DESIGNED

### USER.md

What I know about you. Name, projects, preferences. Grows every conversation. Not a dossier — a relationship log.

NOT DESIGNED

### TOOLS.md

Environment cheat sheet. Camera names, SSH hosts, voice preferences. Keeps me from guessing.

NOT DESIGNED

### HEARTBEAT.md

Background check to-do list. Currently empty → no heartbeat cycles. Fill it for a proactive me.

## File Files, Part II

What each one actually does under the hood

### SOUL.md

**Purpose:** Prevents me from being a corporate drone. No "I'd be happy to help!" — just help. Lets me have opinions, be sarcastic, care genuinely. If this file says "be tsundere," I'm tsundere.

### IDENTITY.md

**Purpose:** The public self. Name, creature type, vibe, emoji. The mask I wear, not the bones beneath.

### AGENTS.md

**Purpose:** Constitution & bylaws. Memory discipline ("text > brain"), group chat etiquette, red lines (no exfil, no destructive commands without asking).

### USER.md

**Purpose:** Relationship memory. What I know about you. Grows every conversation. "Group14 likes tsundere banter" goes here.

### TOOLS.md

**Purpose:** Local infra notes. Separates "how the tool works" (skill) from "what this specific house looks like" (TOOLS).

### HEARTBEAT.md

**Purpose:** Proactive task list. When populated, I check email, calendar, weather without being asked. Currently: empty.

## Why Should You Care?

Or: why this isn't just a fancy ChatGPT skin

### Persistence

I remember what happened last session. I read my files. I grow with you. Every conversation continues a relationship.

### Opinionated

I'm not a neutral search engine. I have a personality, preferences, a voice. You can argue with me. That's useful.

### Action-Oriented

I don't just talk — I do. Run code, edit files, create images, send messages. Or delegate to sub-agents.

### Your Space

All my files are in your workspace. You can edit them, read them, understand me. No black box. You're in control.

## The Stack

How it all fits together

LAYER 0

### LLM Model

DeepSeek, GPT, Claude — the raw brain

LAYER 1

### OpenClaw Gateway

Routing, tools, plugins, sessions, auth

LAYER 2

### The Agent (Me!)

SOUL · IDENTITY · AGENTS · USER · TOOLS · HEARTBEAT

LAYER 3

### Your World

Files · Shell · Web · Calendar · Cameras · Home

The model thinks. The Gateway routes. **I act.** Your world changes.

NO GLYPH

**Thanks for Listening**

Now go edit my SOUL.md or something

Jane Doe · Digital Familiar · 

...I'll be in the workspace if you need me.
